# Not all roof paints are the same

*Ask for it by name*

Shieldcoat is the specialist in roof coatings and custom-colour solutions. 100% Australian-owned and manufactured, the entire Shieldcoat range has been designed to weather the coldest and harshest of hot weather conditions.

Shieldcoat's innovative range of water-based surface coatings can be applied to both new and restorative work. These unique protective coatings are durable, easy to apply and come pre-mixed.

The secret to the flexibility and durability of the Shieldcoat range is that all our water-based products are based on 100% Acrylic Resin with no unnecessary extenders added to the product.

Because the Shieldcoat range is water-based, all products are environmentally sensitive and adhere to the strict health and safety guidelines of The Australian Paint Manufacturer's Federation.

Not only does Shieldcoat guarantee superior coverage, colour and durability, It's the Number 1 choice for homeowners concerned about their environmental impact.

## Advanced, high-performance heat reflection

Thermobond HRC: it's the ultimate surface coating that will not only give you the best looking roof in the street, it will help you keep you cool on even the hottest of days!

Thermobond HRC is a unique heat reflective paint that repels solar infrared and visible rays that cause the build up of heat in roof cavities. A water-based acrylic, it can be applied to both roofs and walls and it's available in Arctic White and a range of fashionable pastel colours. (Arctic White has the highest solar reflectance rating.)

This cool coating can be applied to all exterior surfaces including:

- Colorbond®
- Galvanised Iron
- Cement Tiles
- Fibro
- Decramastic
- Cement Sheeting; and
- Masonary.

Thermobond HRC is ideal for all domestic and commercial applications, from houses, garages and sheds, to patios, storage tanks and more. Because it is a water based acrylic with no toxic additives, Thermobond HRC is the environmentally friendly choice and it's ideal for use on roofs used to collect drinking water.

Thermobond HRC is simply the most advanced, high performance heat reflecting roof/wall coating.

## THERMOBOND HRC

10 year warrantee against peeling/cracking

Superior heat reflection

Cost effective

Environmentally friendly

Low maintenance

Available in many fashionable colours

Reduces air-conditioning costs

## Roofbond roofing paint

Like *Thermobond*, *Roofbond* is a unique acrylic water-based paint designed to coat or recoat all roof surfaces.

It's manufactured using the same innovative process that not only re-colours your roof but produces a waterproof membrane finish that will last for years. *Roofbond* is the affordable, flexible solution whether you're looking to renovate an existing roof, or give a durable, long-lasting finish to a new roof.

- 10 year warranty against peeling/cracking
- Available in more than 52 colours
- Cost effective and environmentally friendly
- Low maintenance
- Washes up in water
- Safe for drinking water collection 7 days after coating.

## More Designer Solutions for Your Home

There's more to the Shieldcoat range than superior roof paint solutions. Shieldcoat has an extensive selection of trade applications and DIY products for all building and renovation projects.

*Textured finishes* to brighten your exterior walls. *Designer stencil paints* to rejuvenate your driveway. *Durable, easy-application concrete paint* for your patio, garage floor or footpath.
